May 24, 2012

### **PREDICT DIABETIC BLOOD SUGAR LEVELS 3 HOURS AHEAD WITH MANAGEBGL**

Melbourne, Australia - announcing ManageBGL.com, a new FREE service for people with Type 1 (Insulin-dependent, IDDM) diabetes. Uniquely, ManageBGL.com predicts Blood Glucose Levels (BGLs) 2-3 hours out, delivers the benefits of an insulin pump without the pump, and integrates data from multiple diabetes devices in real time 'in the cloud'.

ManageBGL.com is a 'virtual insulin pump' on steroids – providing Carb counting, a Bolus Calculator, different time period rates for Target BGLs/Insulin Sensitivity/Carb Ratios, and keeping track of active insulin to prevent stacking.

Unlike a pump however, ManageBGL.com predicts hypos (low blood sugars) 2-3 hours away, using no more blood tests than normal. ManageBGL provides precise, actionable information about Highs and Lows and how to fix them. E.g "Take 3 jelly beans now, and then have 17 grams carbohydrate because there is still 1.3 units insulin active."

ManageBGL.com provides real-time sharing of data between parents (especially important with split relationships), between home and school, with doctors and educators, and more. Data from multiple diabetic devices is integrated in the cloud.

ManageBGL.com's slick graphs show exactly how insulin and carbohydrates interact, making life easier for new diabetics and old ones alike. Normal diabetic statistics like weight, ketones, HbA1Cs, blood pressure, exercise and stress can be logged, and ManageBGL.com provides extensive reports, as well as maintaining a central record of emergency contact information.

ManageBGL.com provides intelligent coaching, with suggestions and warnings based on BGL readings, and these are linked to online references.

ManageBGL.com imports data from any meter, pump or management system, and exports data back to any management system. An open API allows diabetic device from any manufacturer to push data into the system.

## **CONTACT**

Contact: Simon Carter

Title: CEO

Company: ManageBGL, 5 Bond St, Mt Waverley, Victoria 3149, Australia

Website: <http://www.ManageBGL.com>

Tel: +61-3-9913-0595

This service is offered FREE of charge.

## **SYSTEM REQUIREMENTS**

ManageBGL.com is designed to run on Windows and Mac PCs, iPads, iPods, and iPhone and any Smart Phone, and has special layouts for iPhone.

## **ABOUT MANAGEBGL**

ManageBGL.com was founded in 2012 by the founders of DataMystic, a successful data mining, data conversion and software development company.

The ManageBGL.com solution is based on years of research, extensive data modeling and simulation, and draws on the founder's 25 years as a Type 1 diabetic, and 5 years as the parent of a diabetic child.
